Hello everyone!!!

BESU turned into IEST but sadly unlike many other renowned INIs we don't have a "coding club"

So, some of us from 2nd year are looking forward to form a coding club in our institution, which we think is something necessary and seeing the knack of competitive programming in the recent batches it's high time to group them.

We came to know that we already had a programming club (created by [Gaurab Patra](#) da and other seniors) in our varsity but is presently not active. So we came forward with a new club (codeIEST).

After approaching many teachers, Apurba Sarkar(CST dept) has finally agreed to be the mentor of our club. And Prof. Sipra Das Bit (HOD of CST dept) has marked our initiative as a 'good gesture'.

codeIEST's main objectives would be :

- 1)To get more students involved in competitive coding so as to increase participation from our institution in various inter college coding contests like ACM ICPC, Overnite, Facebook HackerCup and several other events. (Recently everyone is so concerned about our institute's recognition outside West Bengal. Maybe this is one way to gain recognition if we perform well in these competitions).
- 2)To organize frequent coding competitions (atleast once in a month) within the university in several platforms like Ahmed-Aly, etc.
- 3)If possible start a "codechef campus chapter" in our university.
- 4)An open forum for discussing problems(same minded people should come together).

Initially, we weren't much confident with our plan & so we didn't publicize it. Thanks to [Pratik Sarkar](#) da (4th year CST) in our endeavor.

We are planning to submit a letter to our Director and PICSA to get our club official and functional.

But before that we would like to hear the views of our seniors, alumni and also our fellow batch mates. We are gathering information on the structure and functioning of the programming club of IITs. We need more advice on what should be our next proceedings and how the club should function. So please do comment!

HAPPY CODING!!!

****PS:** Initiative by CST department students but open to all students interested in competitive programming. So please don't hesitate to comment. Your views are highly welcome!! 😊

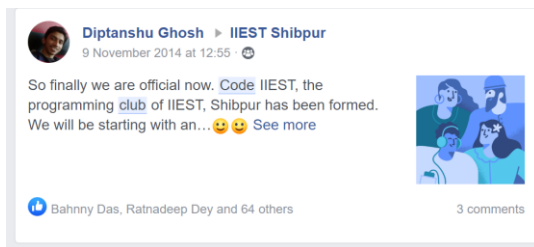

You, Ratnadeep Dey, Anirban Sarkar and 81 others

Execution:

 **Diptanshu Ghosh** shared a group.
9 November 2014

So finally we are official now. Code IEST, the programming club of IEST, Shibpur has been formed. We will be starting with an introductory session on Wednesday, 12th November at the Alumni Seminar Hall from 4:00 pm. People who are interested, please be there. 😊

This is our official Facebook group, where you can discuss algorithms or ask your queries. Your seniors and alumni will be there to help you.

10 November 2014 · 🌐

So we will be organizing our very first session on Wednesday, 12th November. People who are interested to join the club, please be there. This will be an introductory session where we will be telling about the functioning of the club, the future aspects which we are planning to cover, and also about competitive programming.

Venue: Alumni Seminar Hall

EDIT:
Time: 5.00pm-7.00pm

 Nilanjana Lodh, Deepan Das and 7 others
